☒ Continuation Sheet Attached☐ Proposed Amendment or Arguments Attached

Brief Description of Arguments to be Presented:

An interview was conducted on the above-identified application on _____.

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

This collection of information is required by 37 CFR 1.133. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Rejection of Independent Claim 26 under 35 U.S.C. § 102(b)

Claim 26 is rejected under 35 U.S.C. § 102(b) as being anticipated by Roe et al. (U.S. Patent No. 5,776,121, hereinafter "Roe").

Roe appears to disclose a disposable absorbent article including a liquid pervious sheet (38); a liquid impervious sheet (42); an absorbent structure including an absorbent core (44); and standing cuffs (102) comprising standing sheet (62) and stretching members (77). Roe also appears to show that the liquid pervious sheet has a width greater than that of the absorbent structure (*see*, e.g., column 5, lines 15-21: "[t]he topsheet 38 and backsheet 42 extend beyond the edges of the absorbent core 44 to thereby form the periphery 28 of the diaper 20").

However, Roe does not identically disclose where stretching members are arranged in the standing sheet under the meaning of 35 U.S.C. § 102. For example, Fig. 1 of Roe shows elastic members 77 and 84 (spacing means 76 could also be one or more elastic members 77 (column 9, lines 21-22)).¹ However, Fig. 2 which is a cross-sectional view of Fig. 1 does not show where the elastic members are located. Fig. 3 shows cuff area 102, but does not show where the electric members are located, either.

Objections to Drawings, Description, and Claims, and Rejection of Claims under 35 U.S.C. § 112, Second Paragraph

We wish to solve all formality issues, and would like to have your detailed comments on how to amend the documents. We will prepare proposed amendments.

¹ It is unclear as to whether elastic member 77 in other locations could be plural. However, the Examiner's position that each dashed line in Fig. 1 indicates one elastic member 77¹ appears to be incorrect. We believe that each dashed line indicates one of edges of elastic member.
